4 students (Sophia, Scott, Jon, and Annie) are talking about school clubs they have tried before. There are 9 clubs in total: LEGO, math, reading, soccer, coding, history, science, writing, and basketball.

Sophia: Among these 9 clubs, I only enjoyed the reading, writing, and history clubs.

Scott: I hate the history club, and I also don't really like the writing or the soccer club. The other 6 clubs are fine.

Jon: I'm different. LEGO, history, and coding are my 3 favorites, and I also enjoy the reading and writing clubs. I don't like the other clubs.

Annie: I like the LEGO, math, and coding clubs, and I don't like the reading, soccer, and history clubs. I have not tried the science, writing, or basketball clubs. Which ones among these 3 would you recommend?

Based on the recommendation method you learned today, among the science, writing, and basketball clubs, which ones would you recommend to Annie? Use the table below to help you organize the information.
